DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed November 21, 2003 have been fully considered but they are not persuasive.
2. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., see Remarks, page 7, lines 18-20, wherein "the bits which are placed within the image data correspond to information obtained by image processing".) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3,6-8,11-13, 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Braudaway et al (US 5,530,759).

As to claims 1,6,11 and 21, Braudaway et al disclose an image processing apparatus, comprising: a processor, wherein the processor places bits for describing information different from information of image data obtained by image processing on image data.

Art Unit: 2625

original image data only in specific bit positions of multiple bits of pixel data only at predetermined positions of said processed image, each of the pixel data being expressed by using multiple bits (column 4, line 60 through column 5, lines 23).

As to claims 2,7,12 and 22, Braudaway et al disclose pixels are dispersed at a plurality of predetermined positions on said image (column 5, lines 5-23).

As to claims 3,8, and 13, Braudaway et al disclose information different from information of said processed image data is information describing the contents of image processing performed on said original image data to obtain said processed image data 9column 5, lines 5-23).

Claims 23-24 are similarly analyzed and rejected.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4,5,9,10,14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Braudaway et al in view of Rhoads (US 6,285,776).

As to claim 4, Braudaway et al disclose an image processing apparatus according to claim 1 (see claim 1). However, Braudaway et al fail to disclose information different from information of said processed image data is information describing time

when said image processing is performed on original image data to obtain said processed image data.

But, on the other hand, Rhoads in a method for identifying equipment used in counterfeiting discloses information different from information of said processed image data is information describing time when said image processing is performed on original image data to obtain said processed image data (column 2, lines 56-67), in order to address privacy concern when the image data being processed is recognized as corresponding to banknote.

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to provide the method of Rhoads with Braudaway et al in order to address the privacy concern.

Claims 5,9-10 and 14-15 are similarly analyzed and rejected.

Conclusion

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
